^a SINTEF REPORT STF 2204129 "NorGeoSpec 2002" revision 1

The report can be downloaded at www.norgeospec.org

** The frequency of delivery control for the certification procedures are:

QC - one identification test every 50 000 m² but min. one id test for deliveries above 10 000 m²

IPA - one test (SP procedure) every 10 000 m² but min. one test for deliveries above 1000 m²

*** The certificate is under renewal

**** The certificate is under quality observation until a final decision of the Technical Committee is taken

1) For a coexistence period of 6 months (ending 25.03.2012) it is accepted that the product TS4 is identical with the product TS4*

This record is maintained by SINTEF Rock and Soil Mechanics
