<sup>1</sup>Mean values and tolerances given on a CE document with revision date: The CE document is approved by Notified body ID no: June 1st, 2008 0799

<sup>2</sup>The maximum tolerance is applied for determination of the 95% conf. limit when tolerances given on the CE-mark document exceeds the maximum allowable tolerance required in NorGeoSpec 2002. The products are continuously audited to verify that the characteristics fulfils the NorGoeSpec requirements.

<sup>3</sup>The certification values for these characteristics is to be used in delivery control. For the mass per unit area the allowable variation range is given while the minimum value is given for the static puncture strength.
